

Reading Exhibits - With Pictures

Reading Exhibits can display pictures instead of text so students can talk about the picture. This lesson tells how to add an image to a Reading Exhibit. First, have an image stored on your computer. Bring the picture in just before the student makes the recording.

Run Profile Manager, open any profile to a card with a Reading Exhibit; double-click it.

The screenshot shows the Profile Manager interface. The top section contains several dropdown menus and fields:

- Name: Kansas, Lawrence
- Timeframe: Summer, 2009
- Domain: Language Arts
- Topic: Language Arts Contents
- Example: Fond Description
- Template: Speaking - From a Picture

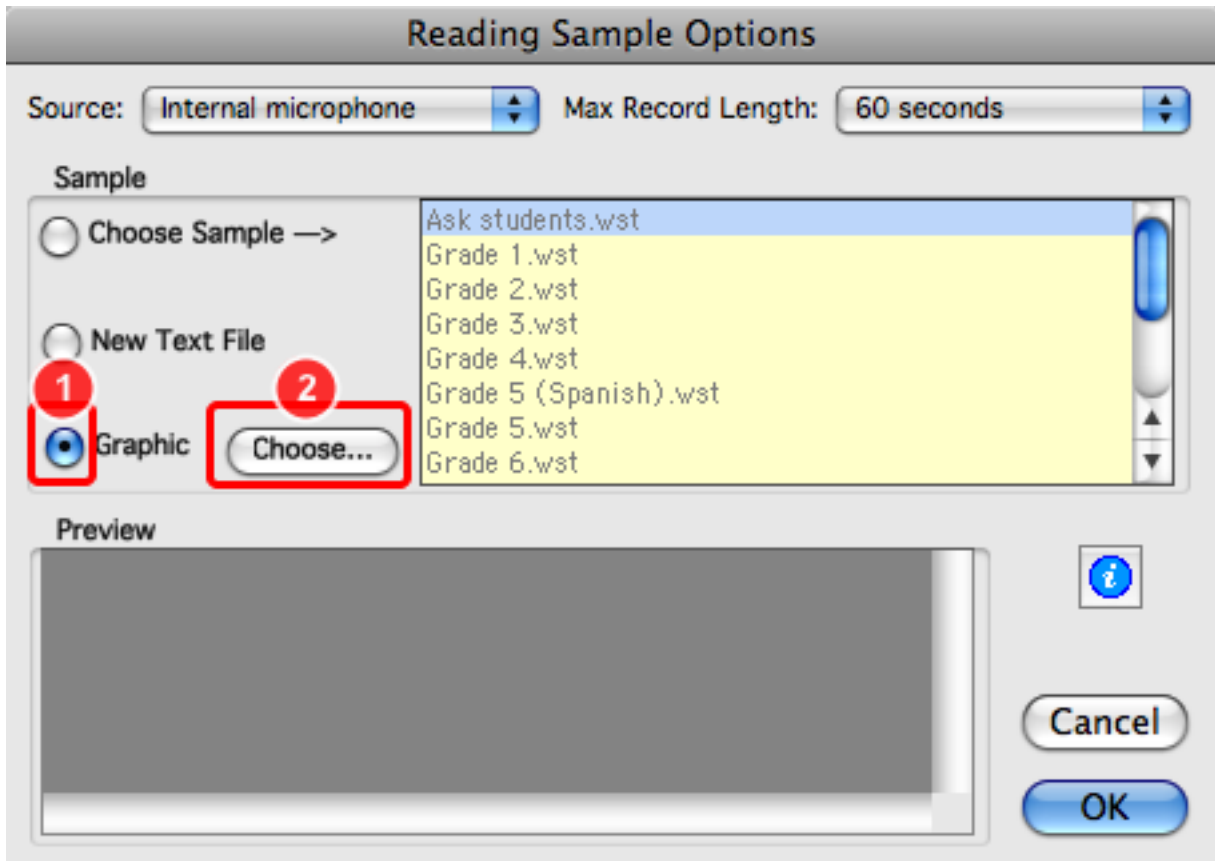

On the right side, there are fields for ID, Created (7/15/09), and Modified (7/15/09). Below these are several icons: a yellow square, a stack of papers, an information icon, a 'Next' button, and a trash can. At the bottom right of this section are left and right arrow buttons and the text '1 of 1'.

The main content area is divided into two sections:

- My Story**: A red box highlights an icon of an open book with a microphone in front of it. To the left of this icon is the text: *It has a little book and a mic.*
- Assignment/Reflection/Comments**: A text area containing the text: "Students were asked to talk extemporaneously about the photo."

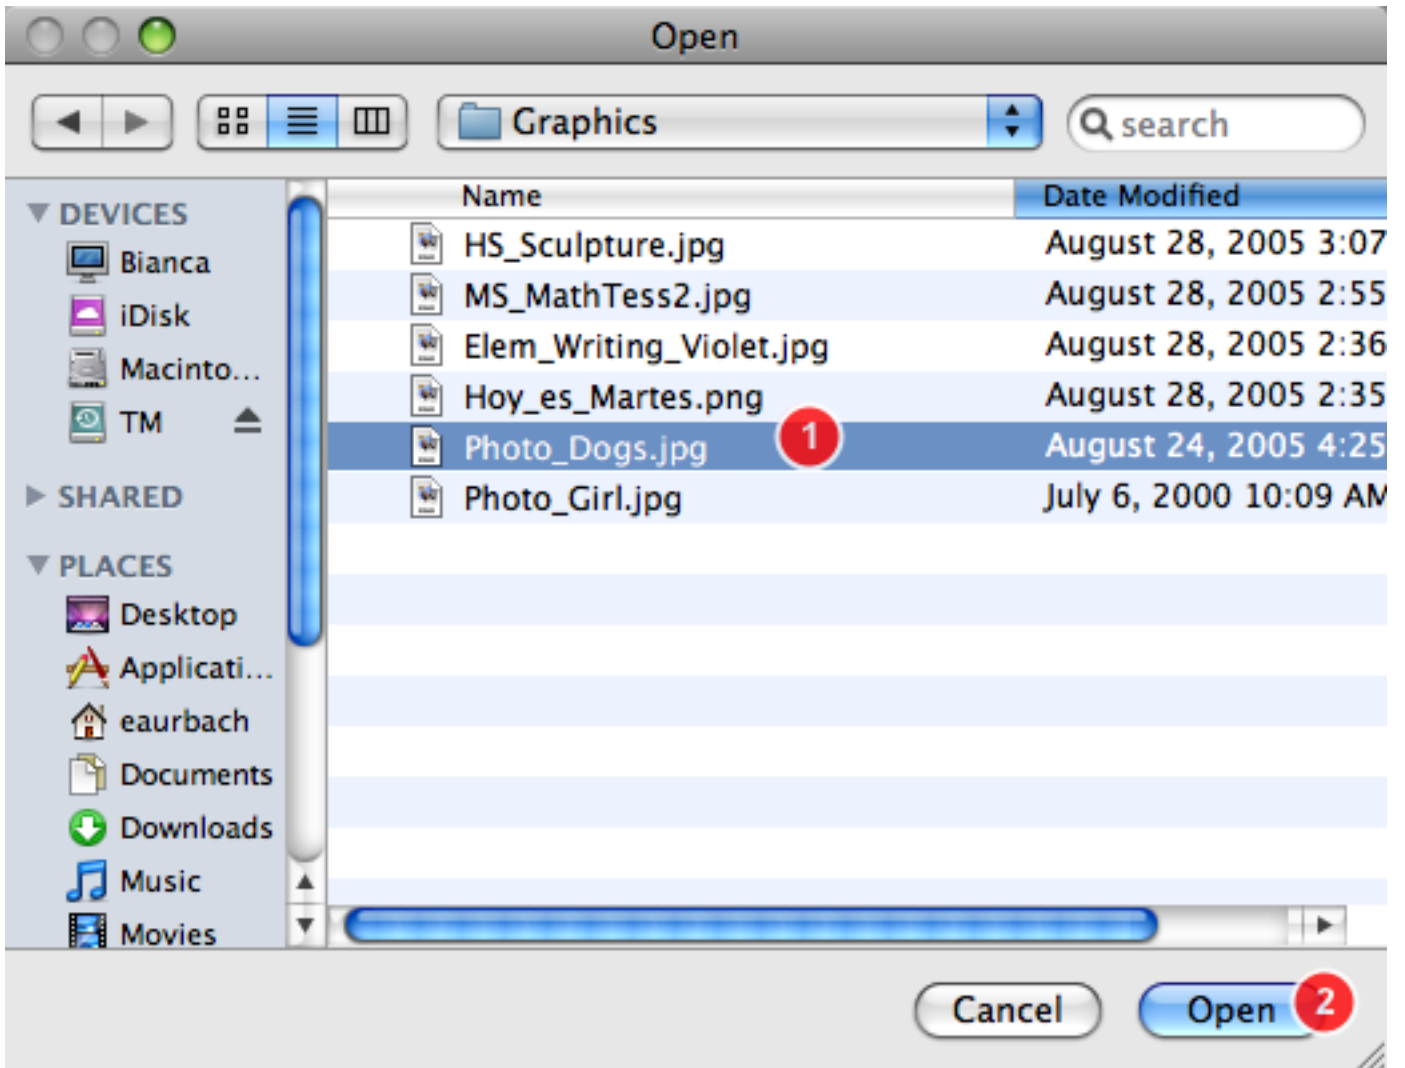

Click Graphic. Click Choose...

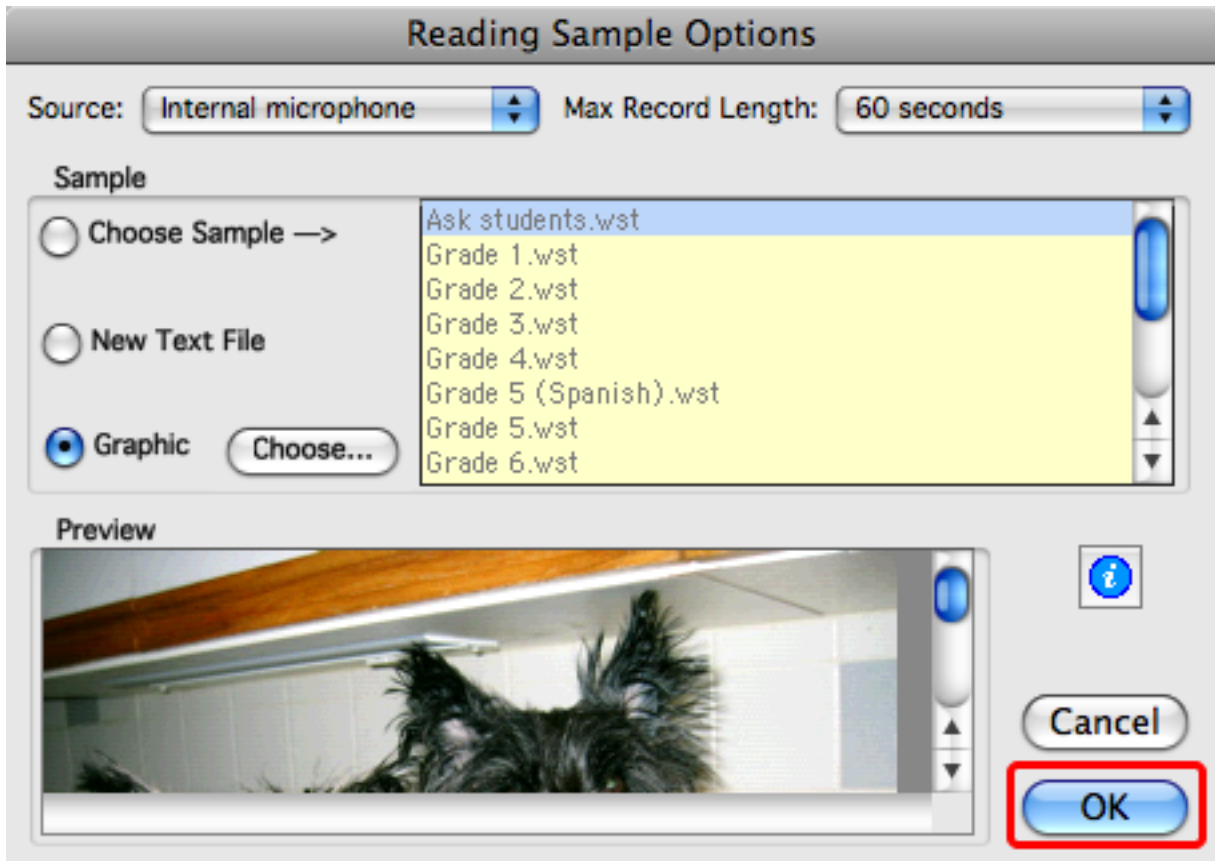

Select a graphic image. Click Open.

The Preview window displays the image. Click OK.

If it's not what you want, click Choose again.

Speak to test the volume level; green is good; red is too loud.
